

MATERIALS:

- Cardboard Shipping Container (Box)
- Shock-Corded Back Pole
- Pre-Assembled Roll-Up
- Heavy Plastic Bag for Stand Assembly
- Thin Plastic Bag for Back Pole
- Pink Foam to Protect Ends
- Padded Carrying Bag (Optional)

1 STEP ONE

Remove display from packing materials and place on ground. (save packing materials)

Rotate footplate to balance display assembly.

2 STEP TWO

Fully extend the included shock-corded pole.

Insert the angled metal attachment of the back pole into the cut groove of the banner's top pole.

For banners over 3' wide, the tip of the back pole will insert directly into the hole in the top bar.

3 STEP THREE

Place your foot onto the foot plate of the display to hold the display down while you pull the vinyl graphic up. Use the back pole to fully extend the banner from the base.

You may tilt the display backwards in order to have the backpole reach the bottom of the base.

4 STEP FOUR

Once the banner is fully extended insert the foot's post into the backpole.

IMPORTANT!

Please save **pink** foam for shipping/transporting your roll-up display.
